OUR LATEST ANNOUNCEMENT CAPTURES MEDIA ATTENTION AND HEADLINES EVERYWHERE

KPIT US CELEBRATES BRING YOUR KIDS TO WORK DAY

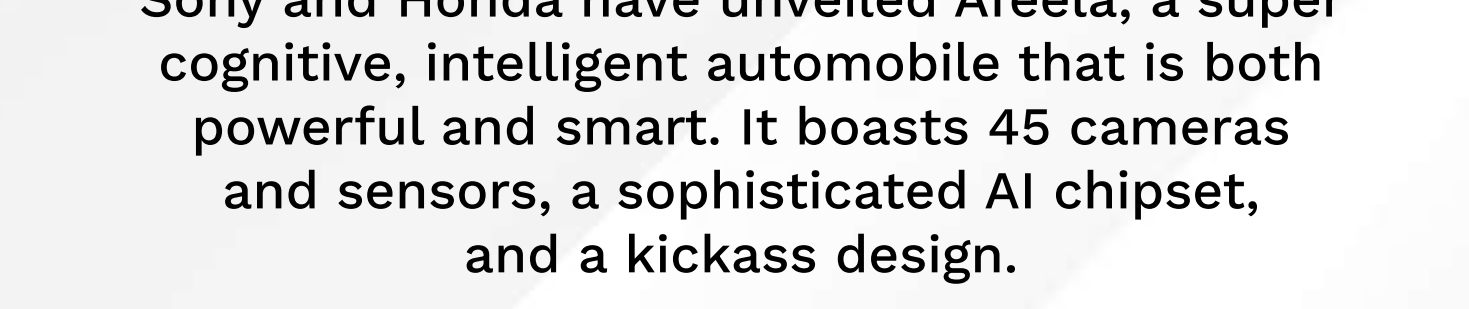

We celebrated 'Bring Your Kids to Work Day' in our US office, which was packed with the excitement of children! We loved having our colleagues' children visit us and had a blast showing the kids what it's like to work at KPIT. From ringing laughter to curious questions, our office was taken over by a bunch of little ones.

The joy on their faces as they learned was the highlight of our day. Who knows, maybe we'll have some future #automobelievers in the making.

FROM JUNK TO GENIUS: KPIT'S CREATIVE WAYS OF HANDLING THE WASTE

Municipal solid wastes (MSW)

E-waste

Lead-acid batteries, electrical waste and waste lube oil

We try to minimize the environmental effect of this restricted waste by reducing its creation and ensuring segregation at the source.

Biodegradable (food and garden) waste: Our composting plant processes around 100 kg of biodegradable waste daily and generates compost, which is used in the garden as manure.

MSW: While keeping a strict check on the use of paper, solid waste is segregated with waste bins placed at strategic locations & recyclables are sent to an authorized vendor.

Hazardous waste: Hazardous waste is disposed of by licensed bodies in accordance with Ministry of Environment and Forests (MoEF) norms.

HERE'S HOPING THESE UPDATES QUENCHED YOUR THIRST!

WE'LL BE BACK WITH SOME EX-ICE-TING UPDATES SOON!
