What's Up @ KPIT

Enjoy a hot cup of tea along

with crispy KPIT updates!

June 18th, 2023

Rejoice KPITians!

We are absolutely delighted to announce the

opening of our new office in Columbus, Indiana!

KPITians joined forces to celebrate this momentous

expansion, setting the stage for a future filled with

innovation, collaboration, and boundless

possibilities.

The opening ceremony was graced by our President

and Joint Managing Director, Mr. Sachin Tikekar and

the attendees were treated to a warm welcome

address by Mr. Chinmay Pandit our Board Member

and Geo Head, Americas & Mr. Tikekar!

systems for passenger cars and commercial vehicles, entered into a partnership to create solutions for automotive systems. Capgemini and Audi have launched a joint venture, XL2, which provides digital technology in the fields of SAP and cloud services. **HERE'S A FEATURE ON ECONOMIC TIMES**

KPIT has started investing in all domains of automotive software. "OEMs need a strong partner for software just like they need one for semiconductors or cloud. This is now the focus of KPIT. Billions of dollars are being invested by vehicle makers that will determine their future business and technology roadmap," says Kishor Patil, CEO & MD, KPIT Technologies, which has made acquisitions worth \$150 million in the last few years in this

area. KPIT, which offers embedded software and product engineering services to automotive companies, has developed multiple centres in North America, Europe and

"More than 80% of our work revolves around cutting-edge SDV programmes. We are playing a key role globally in six out of nine SDV programmes," says Patil. KPIT has tied

Auto enterprises are partnering with IT services providers for exploring new technology applications. Recently KPIT and ZF, the Germany-headquartered company that supplies

up with Renault and Honda as its software integration partners.
