Leveraging the Power of AI to Craft Realistic Scenarios in Automated Driving Testing

Ever wondered how we create lifelike scenarios for testing automated driving systems? In this blog post, we delve into the fascinating world of AI-driven scenario creation. Discover how KPIT's innovative approach converts real-world drive data into testable scenarios, paving the way for efficient and accurate validation. Explore how we achieve time savings of up to 50% through automation, craft realistic scenarios with limited data, and ensure comprehensive testing coverage. Ready to explore the future of automated driving?

Explore the archives of our Mobility Explainers

Are you ready for a crash course in the latest mobility tech? Join us as we unravel how sensor fusion elevates autonomous driving, explore the critical role of middleware in ensuring seamless connectivity, discover how OTA updates are revolutionizing vehicle software, and understand why vehicle diagnostics are essential for maintenance. We simplify these complex mobility trends to ensure you stay ahead of the curve. Eager to learn more? Click on the image to revisit these informative nuggets of knowledge!

Planting a Sustainable Future

Our KPITians in Pune recently embarked on a green mission! They joined hands with the 14 Trees Foundation at Rajguru Nagar and planted over 15 trees. They also got to witness how an IT professional turned barren land into a thriving forest.

Tech Talk with Our Experts

Curious about the future of mobility tech? Dive into our 'Learn From KPIT Experts' series on YouTube! Our colleagues share their thoughts on the latest trends, cutting-edge tech, and what's shaping the future of mobility. Tune in and stay ahead of the curve!
